[Portfolio](#)

[Medium](#)

Associate Tech Lead and full-stack software engineer with 6+ years of experience delivering enterprise applications across fintech, SaaS, streaming, e-commerce and AI/ML projects. Strong in C#/.NET, Angular/TypeScript, Oracle PL/SQL, Python and REST APIs, with practical experience in client-facing delivery, complex database work, Agile/Scrum and engineering productivity tooling. Published researcher and active technical writer with hands-on work in computer vision, recommendation systems and AI-powered creator products.

Work experience

DirectFN | Associate Tech Lead / Software Engineer

Malabe, Sri Lanka | Jul 2022 - Current

- Progressed from Software Engineer to Associate Tech Lead while delivering enterprise fintech applications and client-specific solutions.
- Develop and maintain application components using C#/.NET and complex Oracle PL/SQL database structures to support reliable, scalable business workflows.
- Work in Scrum-based delivery using Jira and formal SDLC practices, including office-based development and onsite client collaboration.
- Researched code obfuscation and security upgrades, and independently built project-build tooling and internal utilities to improve engineering efficiency.

ProjectXSpace | Full Stack Developer

(Remote) Victoria, Australia | Aug 2020 – Apr 2022

- Built full-stack applications using Angular, TypeScript, .NET, Python, SQL Server and REST services, with integrations including Azure Service Bus and Google APIs.
- Delivered an e-commerce/POS platform, a vehicle-routing optimization engine, and a product recommendation system using Python, pandas and scikit-learn.
- Supported software deployment and integration scripts to strengthen continuous integration and repeatable delivery practices.

BevyLabs | Software Engineer

Katugastota, Sri Lanka | Mar 2020 – Sep 2020

- Developed web and mobile solutions using PHP, JavaScript, Angular, Vue.js, Android and Firebase.
- Built the ALTER GEN QR-payment hardware solution using C++, Android and Firebase, and a Shrimp Counter proof of concept using Vue.js, OpenCV.js and Firebase.

Mobitel - Engineering Division | Software Engineer Intern

Colombo, Sri Lanka | Sep 2019 – Feb 2020

- Developed internal web applications using HTML, CSS, JavaScript, PHP and MySQL.
- Created a generator fuel-monitoring solution using C++, Android, MQTT and LDAP to support engineering operations.

Education

Uva Wellassa University | BSc (Hons) in Industrial Information Technology

Sri Lanka | Mar 2016 - Mar 2020

4-year degree • 120 credits • English medium. Relevant study: Software Engineering, Data Structures & Algorithms, Database Management Systems, Web Application Development, Computer Networks, Business Intelligence, Project Management and Research Project.

Skills

- **Frontend:** Angular, React, Next.js, Vue.js, TypeScript, JavaScript, Bootstrap
- **Backend & APIs:** C#, .NET / .NET Core, Entity Framework, Python, Flask, Express.js, Laravel, REST APIs
- **Mobile:** Flutter, React Native, Ionic
- **AI & Data:** scikit-learn, TensorFlow, OpenCV, pandas, NumPy
- **Databases:** Oracle PL/SQL, SQL Server, MySQL, MongoDB, Firebase
- **Cloud, DevOps & Infrastructure:** DigitalOcean, Azure DevOps, Docker, Git, CI/CD, Linux Administration, Load Balancer Configuration, DNS & Server Configuration
- **Tools:** Jira, Postman, Visual Studio, VS Code, PyCharm, Jupyter, Figma

Recent Projects

ToolGenie | Full Stack Developer & Tech Lead Jan 2025 – May 2026

- Built and led an AI-powered creator platform using Next.js for both frontend and backend, integrating AI content generation, SEO tools, creator automation, REST APIs, subscription/token management and YouTube workflow assistance.
- Built and published ToolGenie YouTube Tools, a Manifest V3 Chrome Extension providing real-time AI-powered title, description, tag and SEO assistance through secure backend APIs.

AYOZAT STREAM | Full Stack Developer & Tech Lead May 2023 – Jul 2024

- Developed scalable streaming solutions across web and mobile using React, Node.js and Flutter, covering Live TV, VOD, REST APIs, monetization integrations, responsive interfaces and content personalization.

RightsMint | Full Stack Developer & Tech Lead Jan 2023 – Jul 2023

- Built a Web3 platform for fractional intellectual-property ownership, integrating Solana, smart contracts and APIs for secure decentralized transactions.

Publications & Technical Writing

Research publication: High Tech Vision to Detect Currency Denomination and Virtual Wallet for Visually Impaired People - IRCUWU 2020. [Proceedings](#)

Book: Python Sinhala Book - 2020.

Technical Writing: Articles on AI, software engineering, networking, API scalability and load testing. [Medium Profile](#)

Awards & Leadership

- 1st Runner-Up - Mobitel Smart Sri Lanka Hackathon, 2019.
- 1st Place - UWU GameJam, Mozilla Campus Club, 2018.
- 7th Place - Cyber Security Quiz Competition, Sri Lanka CERT|CC, 2019.
- Vice President - Computer Society, Uva Wellassa University, 2018.
